

The *RJGP* publishes manuscripts on general practice. Original research papers (also Systematic Review and Meta-analysis), case reports, and letters to the editor are considered for publication, all of which undergo extensive peer review prior to their acceptance. Review articles and Editorials are invited, but unsolicited reviews can be proposed to the editors by sending the title for initial consideration. Primarily, they are reviewed by the editors and biostatistical advisors. If extensive revision is not required, peer review will be done by at least 2 experts in the field. Otherwise the author(s) have to revise their manuscripts before the peer review process. Based on the comments of reviewers and the responses or revisions of the author(s), the Editorial Board either accepts or rejects the manuscripts. Reviewers' and authors' identities are kept confidential, and the existence of a submitted manuscript is not revealed to anyone other than the reviewers and editorial team.

Aims and Scope

Research Journal of General Practice (*RJGP*) is an international, peer-reviewed, open-access journal dedicated to advancing knowledge and improving clinical practice across the full spectrum of general practice, family medicine, primary care, general internal medicine, and preventive healthcare. The journal serves as a platform for disseminating high-quality research, evidence-based clinical practice, healthcare innovation, and interdisciplinary collaboration that contribute to improving patient outcomes and population health.

RJGP aims to publish scientifically rigorous and clinically relevant articles that support general practitioners, family physicians, internists, primary care clinicians, nurses, allied health professionals, researchers, educators, and policymakers. The journal emphasizes patient-centered care, disease prevention, early diagnosis, health promotion, chronic disease management, community-based healthcare, and the translation of research into routine clinical practice. The journal welcomes contributions from all regions of the world and encourages research addressing contemporary challenges in primary healthcare, including digital health, artificial intelligence, precision medicine, health equity, and sustainable healthcare delivery.

RJGP publishes original, high-quality research covering all aspects of general practice and primary healthcare.

Submission of Manuscripts

Manuscripts along with a covering letter and the signed Authors' Agreement Form (available from www.rjgp.org) should be submitted to the Editor-in-Chief of the *RJGP* via the online submission system.

Electronic submission. The online submission is available on the journal's web site (www.rjgp.org) and is the only way of manuscript submission.

Preparation of Manuscripts

General Instructions. Manuscripts should follow the stylistic conventions set forth in the *American Medical Association*

Manual of Style, 10th edition. The Editors have the right to make editorial corrections and additional changes with the knowledge and approval of corresponding author. The preferred word processing format for the manuscript file is Microsoft Word. The main manuscript should carry the title page, abstract, main text, references, figures legends, and tables of the paper. Figures, including diagrams, photographs, etc, should be supplied separately and submitted as supplementary files. Please do not attach figures in the digital format of the main manuscript.

Manuscripts should be double-spaced, with 2.5-cm margins on all sides of the paper. All abbreviations must be spelled out the first time they are used, followed by the abbreviated form in parentheses. Units of measurement must be complied with the International System of Units (SI).

Original Research Papers. The journal considers Systematic Reviews and Meta-analysis as Original Articles provided that they are conducted using a rigorous, transparent, and reproducible methodology and comply with international reporting standards. Original papers should be arranged as: Title Page, Abstract, Introduction, Methods, Results, Discussion, Conclusions, Acknowledgements, References, Tables, and Legends. The title page must include the following: title; full first name; surname; affiliations of each contributor; each author's highest academic degree; the name, full postal address, telefax/telephone numbers of the contributor who will deal with correspondence; keywords; and the total number of pages and figures being submitted. A structured abstract (with the subheadings Introduction, Materials and Methods, Results, and Conclusions) should appear on the second page of the manuscript and should not exceed 250 words. The main text (excluding the abstract and references) should not exceed 3000 words. A PRISMA flow diagram is required for systematic reviews and meta-analyses.

Reports of Clinical Trials. Original research papers that report a randomized controlled trial, should comply with the guidelines provided by the *Consolidated Standards of Reporting Trials* (CONSORT) group. Also, supplying the manuscript with a CONSORT flowchart diagram is highly encouraged. Please refer to the CONSORT web site to see the guidelines and the flowchart template.

Although it is not obligatory yet, researchers who would like to publish reports of their clinical trial in *RJGP* are strongly encouraged to register their studies in a registry of clinical trials proposed by the World Health Organization or the International Committee of Medical Journal Editors. As an option, the Iranian Registry of Clinical Trials is a registry suggested by the World Health Organization.

Reviews. Anyone wishing to write a review for the journal should first contact the editors. Review articles should be composed of systematic critical assessments of literature and data sources pertaining to clinical topics, emphasizing factors such as cause, diagnosis, prognosis, therapy, or prevention. They should have unstructured abstracts. All

Instructions to Authors

articles and data sources reviewed should include information about the specific type of study or analysis, population, intervention, exposure, and tests or outcomes. Authors of review articles should be experts and have contributions in the field of the addressed subject.

Special Reports. Manuscripts that cannot be considered as a review or original article, or those with special features, such as national reports, will be considered to be published in this section, upon the decision of the editor.

Case Reports. Case reports should be arranged as follows: Title Page, Abstract (nonstructured, not exceeding 150 words), Introduction, Case Report, Discussion, References, and Legends. The length should not exceed 700 words.

Brief Communications. Original research papers can also be published in a brief format. Submitted papers that are of interest but are not acceptable as a full-length original contribution are offered by the editor to be published in this section. Also, the authors can primarily submit their papers for consideration of publication in this section. An unstructured abstract not longer than 150 words is required for this section. The body of the manuscript should not exceed 1500 words, and no heading or subheading should be used. Tables and/or Figures should be limited to 2 ones and references to 15 in maximum.

Letters to the Editors. Correspondence will be considered for publication if it contains constructive criticism on previously published articles in the *RJGP*, the authors of which will have the right of reply. Also, reports of limited research or clinical experiences can be submitted in the form of a letter. The length should not exceed 700 words.

Fillers. Fillers are materials, including text and image, to be published in the blank spaces of the journal. The subject is not restricted, but those related directly or indirectly to medicine are preferred. Quotations, interesting pictures, historical notes, and notice on events are some examples. Please contact the editorial office via e-mail (info@rjgp.org) to send fillers.

References. Our reference style requirements are in accordance with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals by the International Committee of Medical Journal Editors (ICMJE updated October 2008, available from: <http://www.icmje.org/>). Number references in the order in which they appear in the text; do not alphabetize. In text, tables, and legends, identify references with superscript Arabic numerals in parentheses.

Note: List all authors when there are 6 or fewer; when there are 7 or more, list the first 3, followed by "et al"

Samples:

Articles in journals

Raaijmakers R, Schroder C, Monnens L, Cornelissen E, Warris A. Fungal peritonitis in children on peritoneal dialysis. *Pediatr Nephrol.* 2007;22:288-93.

More than 6 authors

Piraino B, Bailie GR, Bernardini J, Boeschoten E, Gupta A, Holmes C, et al. Peritoneal dialysis-related infections recommendations. *Perit Dial Int.* 2005;25:107-31.

Books and other monographs

Brady HR, Clarkson MR, Lieberthal W. Acute renal failure. In: Brenner BM, Livine SA, editors. *Benner & Rector's the kidney*. 7th ed. Philadelphia: WB Saunders; 2004. p. 1215-75.

For samples of reference citation formats, authors should consult National Library of Medicine web site: http://www.nlm.nih.gov/bsd/uniform_requirements.html

Keywords. Between 3 and 10 key words for indexing should be typed at the bottom of the title page for each manuscript. These words should be identical to the medical subject headings (MeSH) that appear in the Index Medicus of the National Library of Medicine.

Figures and Tables. Figures and tables should be kept to a necessary minimum and their information should not be duplicated in the text. Figures must be supplied either as JPEG or TIFF. Do not embed the figures in the manuscript file. Tables should be typed on separate sheets of the manuscript file, be numbered (with Arabic numbers), and have a title. Include double-spaced legends (maximum length, 60 words) on separate pages. Computer-generated images and photographs must have acceptable quality (at 300 dpi or higher).

Covering Letter. All manuscripts must be accompanied by a covering letter signed by all authors. The name, address, telephone number, fax number, and E-mail address of the corresponding author must be provided. Previous publications or presentations of the manuscript or its parts, conflict of interests, and financial supports, if any, should be addressed in the covering letter.

Ethical Requirements and Authors' Responsibility

Author(s) should certify that neither this manuscript nor one with substantially similar content under their authorship has been published or being considered for publication elsewhere in any language, except as described in the covering letter. The *RJGP* follows the latest definition for authorship provided by the *Uniform Requirements for Manuscripts Submitted to Biomedical Journals*. All authors should have a substantial contribution to the manuscript and take public responsibility for its contents. All persons designated as authors are assumed to qualify for authorship and all those who qualify are listed. The corresponding author takes responsibility for the integrity of the work as a whole, from inception to published article. In the event that an author is added or removed from the list of authors, written acceptance, signed by all authors, must be submitted to the editorial office.

Any financial interests, direct or indirect, in connection with the author(s) manuscript must be disclosed in the covering letter. Furthermore, sources of financial support of the project are named in the covering letter as well as the Acknowledgements.

If the work involves experimentation on living animals, the author(s) must provide evidence that the study was performed in accordance with local ethical guidelines. If the study involves human beings, the author(s) must include a statement that the study was approved by the local ethical committee and that informed consent was obtained from the study participants. For those investigators who do not have

formal ethics review committees, the principles outlined in the Declaration of Helsinki should be followed.

All relevant permissions to cite the unpublished observations of others must be obtained by the manuscript author(s). The names and initials of these persons must be cited in the text, and permission from the original author(s) must be obtained. Permission also must be obtained to reproduce or adapt any figures or tables that have been published previously.

Misconduct. The *RJGP* complies with the international regulations against scientific misconduct (fabrication, falsification, and plagiarism). Any suspected act of misconduct in the submitted materials to the journal will be meticulously assessed and the needful action will be taken based on the guidelines of the Committee on Publication Ethics (COPE). Authors are asked to be careful about using the others' words, ideas, and materials and fully cite any sources of the contents of their submitted papers, if they are not original. Sentences extracted from other sources should be supported by reference citation and be in quotation marks or be appropriately paraphrased. Please see the Appendix for definitions of scientific misconduct.

Copyright

© [Year] Author(s). Authors retain the copyright of their published work without restriction.

By submitting and publishing in the *RJGP*, and upon acceptance for publication, authors grant *RJGP* a non-exclusive, worldwide, perpetual license to publish, reproduce,

distribute, archive, preserve, index, and promote the work in all media and formats, identifying *RJGP* as the original publisher.

All articles published in *RJGP* are made available under the Creative Commons Attribution 4.0 International (CC BY 4.0) license. This license permits anyone to copy, distribute, display, perform, adapt, and build upon the work, including for commercial purposes, provided that appropriate credit is given to the original author(s), a link to the license is provided, and any changes made are indicated.

Authors are encouraged to share and disseminate the published version of their articles immediately after publication, provided that the original publication in *RJGP* is properly acknowledged and cited.

All authors must read, complete, sign, and submit the Authors' Agreement Form together with their manuscript as part of the submission process (available from <http://www.rjgp.org>).

**Note: For a complete version of the instruction, see the RJGP's web site.*
